

Vaccines work.

These are the facts:

Vaccination reduces

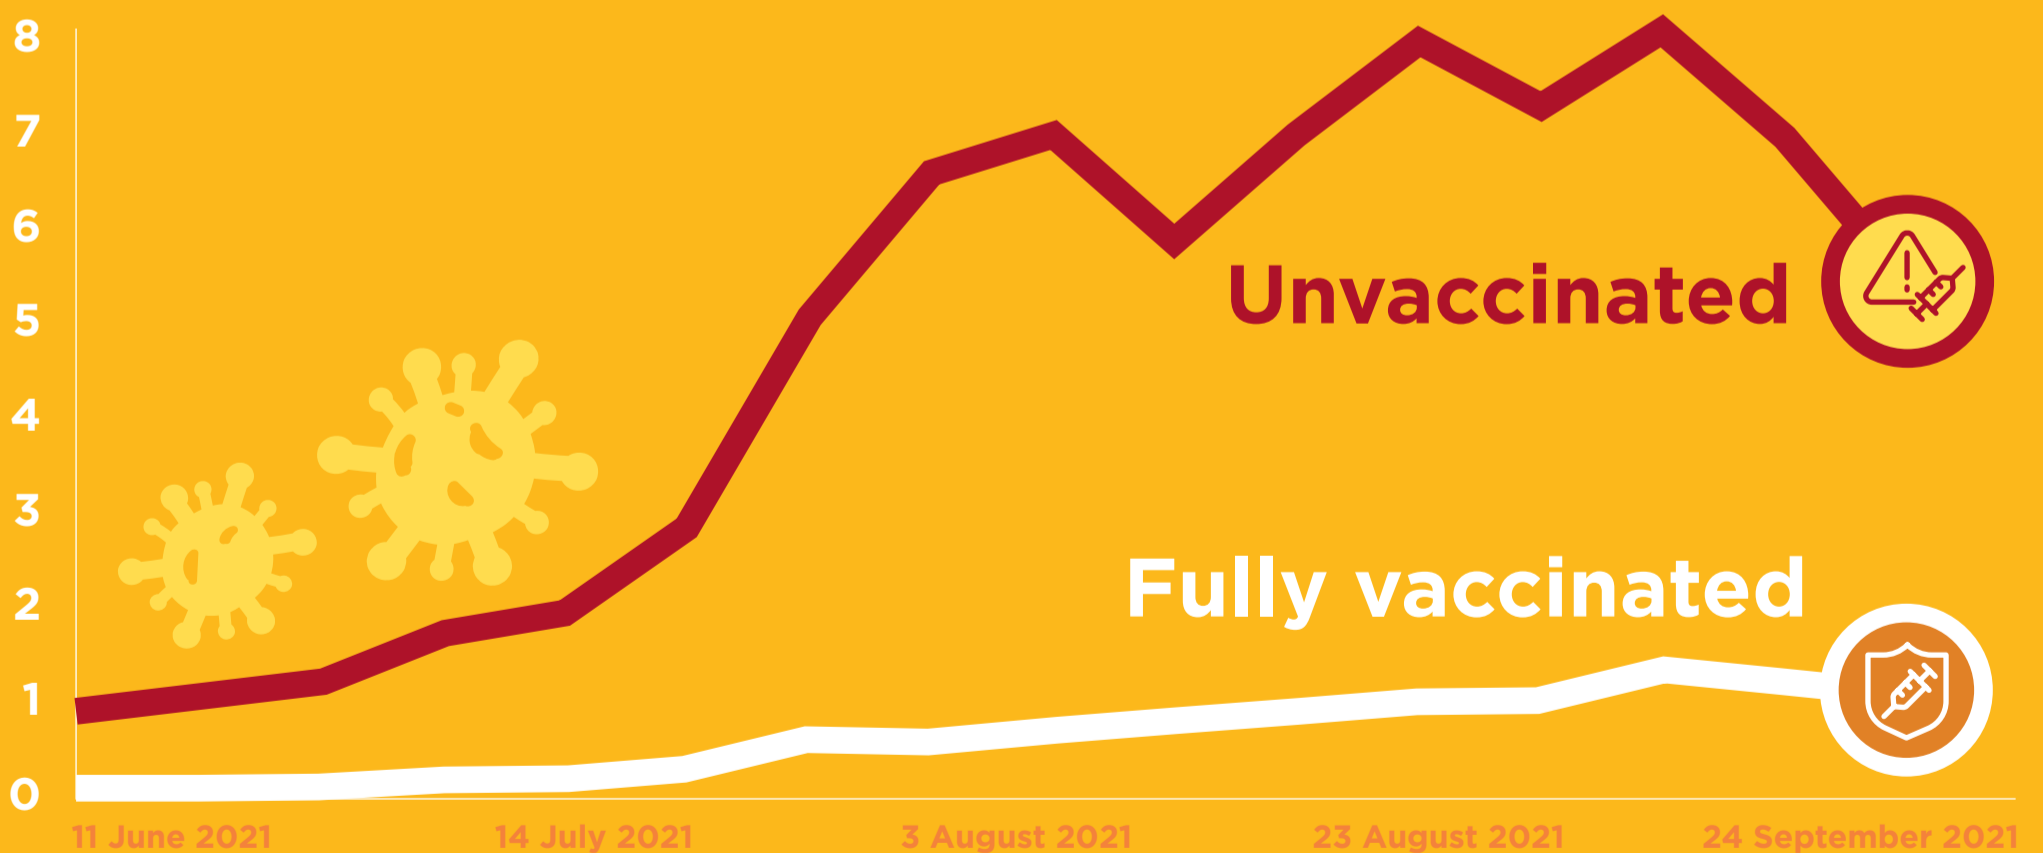

- The risk of getting and spreading COVID-19.
- The chance of serious illness from COVID-19

Vaccination is

- Over 80% effective in protecting against hospitalisations due to Covid-19
- Over 90% effective in helping prevent deaths from COVID-19.

This graph from the United Kingdom shows that vaccination works – most people who died from COVID-19 are unvaccinated.

Get vaccinated today, play your part in protecting yourself and those you love.
